CAREER OBJECTIVE

Entry-level **Cybersecurity Analyst** with hands-on experience across **Security Operations (SOC)**, **Ethical Hacking**, and **Vulnerability Assessment & Penetration Testing (VAPT)**. Strong foundation in **SIEM monitoring**, **threat detection**, **incident response**, and **web/network penetration testing** using industry-standard tools. Actively seeking an opportunity in **SOC**, **Cybersecurity Analyst**, or **Junior VAPT** roles to contribute to defensive and offensive security operations.

EDUCATION

Bachelor of Engineering (B.E) – Computer Science Engineering (Cyber Security) Prince Dr. K. Vasudevan College of Engineering and Technology, Tamil Nadu	2023-2027 CGPA: 9.4 / 10
Senior Secondary (Class XII), BOARD Prince Srivari Senior Secondary School, Chennai	2023 Percentage:74%
Secondary School (Class X), BOARD Prince Srivari Senior Secondary School, Chennai	2021 Percentage:84%

TECHNICAL SKILLS

Ethical Hacking & VAPT	Vulnerability Assessment & Penetration Testing (VAPT), Web Application Pentesting (OWASP Top 10), Nessus Scanning, Burp Suite Testing
Security & Pentesting Tools	Kali Linux, Nmap, Burp Suite, Metasploit, Wireshark, Nessus, VirusTotal, OSINT Tools
SIEM & Log Analysis	Splunk, Log Correlation, Event Analysis, Windows & Linux Log Investigation
Operating Systems, Scripting	Windows, Kali Linux, Linux (Ubuntu), Basic Python, Basic Java, Bash
GRC & Compliance	ISO 27001 Basics, NIST CSF, Risk Assessment, Audit Support

PROJECTS

Defendrix – SOC Monitoring & Incident Response Project

- Designed and implemented a SOC-focused security monitoring project for detecting and investigating security incidents
- Integrated SIEM-based log monitoring to identify brute-force attempts, suspicious logins, and malicious activities
- Performed alert triage, log correlation, and incident investigation using standard SOC workflows

DarkWire - Secure Chat Platform

- End-to-end encrypted messaging with custom key-PIN authentication and offline message delivery
- Real-time WebSocket communication supporting file sharing, cross-device sync, and persistent channels

EXPERIENCE

VAPT – EyeQ Dot Net Pvt Ltd

- Conducted web application Vulnerability Assessment and Penetration Testing (VAPT) to identify security flaws such as XSS, SQL Injection, and security misconfigurations using industry-standard tools.
- Documented findings and delivered concise reports with actionable remediation recommendations aligned with OWASP Top 10 security standards.

CERTIFICATIONS

Ethical Hacker – Cisco Networking Academy
CNSP (Certified Network Security Professional) – The SecOps Group
Palo Alto Networks Certified Cybersecurity Practitioner - Palo Alto Networks
Certified Ethical Hacking & Penetration Testing (CEHPT) - CyberLand Sec
Certified Red Team Operations Management (CRTOM) - Red Team Leader
